B. Management Discussion and Analysis report

Your Company has ceased its operations in relation to investment consulting and other related activities and has recently diversified into activities relating to IT Solutions and Consulting services.

Industry structure and developments *

The year saw a lot of transformations in the Indian Information Technology-Business Process Outsourcing (IT-BPO) sector. The sector has revamped itself to face the challenges presented

by a macro-economic environment which witnessed substantial volatility in commodity prices, inflation, and decline in GDP rates, cross-currency movement, finally culminating in the economic downturn. The Indian economy has also been impacted by the recessionary trends.

The Indian IT industry has displayed resilience and tenacity in countering the unpredictable conditions. Consequently, India has retained its leadership position in the global sourcing market. The industry is expected to witness sustainable growth over a two-year horizon. While the industry has significant headroom for growth, competition is increasing, with a number of countries creating enabling business environments aimed at replicating India's success in the IT industry. Hence, concerted efforts are required by all stakeholders to address the current challenges, to ensure that India realizes its potential, and maintains its leadership position.

India's fundamental advantages - abundant talent and cost are sustainable over the long term. With a young demographic profile, where over 3.5 million graduates and postgraduates are added annually to the talent base, no other country offers a similar mix and scale of human resources. India enjoys a cost advantage of around 60-70 per cent as compared to source markets.

Timely government policies and increased public-private participation have played a key role in developing an enabling business environment for the Indian IT-BPO industry. Establishment of Software Technology Parks of India (STPI) stands out as a seminal policy action, specifically targeted towards encouraging, promoting and boosting the export of software and services from India.

Opportunities and Threats *

It is an observed trend that the global technology companies, in order to reduce the time for introducing new products and services, are increasingly outsourcing their software development and research activities. The size of the opportunity in hand can be gauged from the fact that India currently accounts for just over 4 per cent of worldwide technology related spend. Additionally, growth in global sourcing is estimated to be almost four times that of technology related spend. Your company views this as a major opportunity, as India is the preferred destination for technology outsourcing.

Your Company aims at providing future-proof and future adaptable technologies to its clients. Your Company has the range of expertise and experience spread across various business models and platforms, to exploit the opportunities presented.

Segment-wise performance

Your company has diversified into Information Technology solutions and consultancy business in 2009. Prior to this, your company was carrying on financial services business. Consequent to this diversification, your company has approached RBI for surrender of its registration as a Non Banking Financial Company (NBFC), vide letter dated June 19, 2009. The segment wise performance is as below:

Particulars	Financial Services	Information Technology
	31.03.2009 (in Rs.)	31.03.2009 (in Rs.)
Segmental Revenues (net)	(4,430,225.49)	9,728,200.00
Identifiable operating expenses (including depreciation)	2,500,657.18	2,923,521.27
Segmental operating income	(6,930,882.66)	6,804,678.73
Capital Employed	36,401,801.16	11,298,869.41
Capital Expenditure	-	571,000.00

Future Business Outlook *

While the 2009 outlook for global technology related spending is affected by the recessionary environment, a rebound is expected from 2010 onwards. Worldwide adoption of outsourcing is also expected to rise significantly in the coming years. Sustained demand, robust fundamentals and a supportive business environment will help realise the significant potential the IT-BPO industry offers, both for exports and the domestic market.

During 2008-09, your Company had obtained the rights over the intellectual properties rights (IPRs) of the software developed by Intek Systems Private Limited, Maldives. Using these IPRs, your Company develops customised software in line with the specific requirements of the Clients and the same is implemented at their end. This business is being carried on by a separate division of the Company named Intekk. Your Company currently caters to the needs of the Customers/clients based at Maldives and also plans to venture into other markets like Mauritius, South Africa, U.A.E., Singapore, among others.

Your Company also plans to increase its revenue generation by venturing into IT solutions & IT consulting like logistics, supply chain, product solutions, ERP solutions, etc.

Risks and concerns

Our revenues from Information Technology business are derived in US Dollar while more than 50% of the costs are in Indian rupees. The exchange rate between the rupee and US Dollar has fluctuated significantly in recent years and may continue to fluctuate in the future. Currency fluctuations can adversely affect our revenues and gross margins.

In an economic slowdown, many Companies may reduce or postpone their technology spending significantly. Reduction in spending on IT services may lower the demand for our services and negatively affect our revenues and profitability.

Further, any significant decrease in the growth of the Tourism and resorts industry, on which we currently focus, may reduce the demand for our services and negatively affect our revenues and profitability.

We are favorably positioned due to our quality leadership, our ability to create client loyalty and our expertise in select markets.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources.

When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each Balance Sheet date and adjusted to reflect the current best estimate. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.

Provisions on unsecured loans for Non-performing Assets have been made in accordance with the Non-Banking Financial (Non-Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2007.

Contingent assets are not recognised in the Financial Statements since this may result in the recognition of income that may never be realised.

- n. Share Issue Expenses: Share issue expenses has been debited to the Profit and Loss account based on Management's decision.
- o. Cash Flows

Cash Flows are reported using the indirect method, whereby Profit Before Tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments.
